

# Bola bowling machines

Durant Cricket is an official distributor of Bola products and as such offers the following range of machines to suit all budgets and applications.

## Bola Pro Mains operated

Fully enclosed cricket bowling machine.

- Concave profile moulded urethane ball delivery wheels.
- Microprocessor based digital speed control with membrane switch panel.
- Adjustable speed in increments between 15 and 95 mph.
- Spin, swing and pace bowling with 19 spin and swing settings.
- Electronic random variation facility with solid state electronic wheel braking.
- Ball joint complemented by vernier screw adjustment for precision line and length.
- BOLA Power Pack from 230V mains (or 110V if specified).

Also available as:

## Bola Pro 12V battery operated machine

Features as above but powered by 12 volt battery.

## Bola Club Mains operated

Fully enclosed cricket bowling machine.

- Concave profile moulded urethane ball delivery wheels.
- Microprocessor based digital speed control with membrane switch panel.
- Adjustable speed in increments between 15 and 80 mph.
- Spin, swing and pace bowling with 19 spin and swing settings.
- Ball joint complemented by vernier screw adjustment for precision line and length.
- BOLA Power Pack from 230V mains (or 110V if specified).

Also available as:

## Bola Club 12V battery operated machine

Features as above but powered by 12 volt battery.

## Bola bowling machines

### Automatic feeder

An automatic ball feeder to fit all Bola bowling machines.

- Fitted in less than 2 minutes.
- Feeds a ball into the machine every 7 or 11 seconds (as selected).
- Optional remote control on/off switch allows interruption of the sequence when required.
- Warning lights indicate release of ball. The ball feeder offers a unique solo batting practice facility or the option to coach from any position.

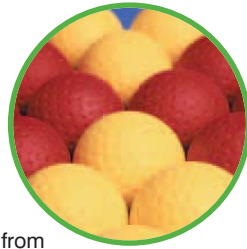

### Bola stands

Bola stands accept any Bola machine with no modification required. They enable the machine to be easily wheeled around without dismantling and so maximises the time in use. They also address the Health & Safety issues which arise from operating a bowling machine.

Bola stands offer the operator almost complete protection from the ball hit back by the batsman and are a stable standing platform for safe operation.

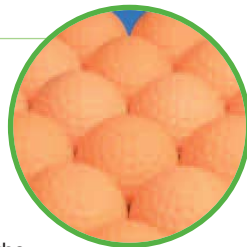

If there is space to 'park' the machine and stand together this is a drastic saving in set-up time and less potential for the machine to be damaged by mishandling.

### Bowling machine balls

- Polyurethane practice balls in red or yellow with soft case to protect bats from damage.
- Dimpled like a golf ball for stable flight
- These give the best accuracy and realistic bounce.
- Yellow balls for better visibility indoors.
- Red for realism.
- Available in packs of 12 only.

### Orange 3oz practice balls

- The composition of the Hi-Viz ball has been specially developed to make the ball a little firmer and give extra bounce.
- The ball is most accurate in use and holds its shape better to make the bounce more realistic.
- Available in packs of 12.

### 12V Battery

A 12 volt leisure battery for use with all Bola machines.

- Fitted with a carrying handle for portability.
- Designed to be run flat and recharged as necessary (unlike automotive batteries).
- Give between 2 and 6 hours between recharges.
- Charge from 12 volt car charger or Bola Power Pack.
