

Discount price list for CS members

Durant Cricket are delighted to be a preferred supplier of cricket ground equipment for Cricket Scotland and CS member clubs

Mobile covers

We have redesigned our Mobile Cricket Covers for this season, adding more protection by covering more of the bowlers' run-ups, in addition to the square, so the covers now measure 24 metres in total. These domed shape cricket covers are becoming a common sight on cricket grounds throughout the UK – from village cricket grounds to Test and International cricket venues.

An important benefit of the redesigned covers is the ease of manoeuvrability. It can be pushed on and off of the square by one person, saving time and effort and, as a result, keeping the pitch playing surface as dry as possible. This time saving could well be the difference between getting a game back on later on and even getting a game played to a finish.

Our mobile covers are manufactured to our design, comprising three lightweight units which are easy to put together so they are ready to use very quickly.

How are the covers made?

The covers come in two parts, the chassis and the cover tops. The chassis consists of 2mm folded steel and an arch support system is created from 25mm tubing. This is galvanised to prevent rust. Ridge poles strengthen the structure and give more protection from the elements. Plastic moulded bungee fixings offer more protection from the threat of rust.

The cover tops are made from 610 gsm heavyweight material with a welded flap for joining the two units. They can be supplied in green, white and blue with a sponsor's logo area available if required. If you want another colour, please ask!

What else is included?

Your set of covers comes with 75 metres of tricoflex hose and other spare parts and extra hoses are available from stock. Optional extras to give even more protection such as bowlers' run-up sheets and wicket protection are also available. A 10-year steel guarantee comes as standard and the tyres are foam-filled to prevent against punctures.

Sight Screens

Durant Cricket has a wide range of sightcreens with options to suit every club or school; we aim to provide clubs and schools with the best possible solution for their needs.

The Durant Cricket standard polypropylene sightcreens are made from galvanised metal and the frames are 4.5m high and you can choose from either a 4m or 5m wide screen. Overlaps are also available, so you can put more than one together with no gap in the middle.

More and more clubs and schools are going for this option as it cuts down on the time involved in swapping the one sight screen over, after each ball, for the bowler to bowl around and over the wicket! One other key feature of the Durant Cricket polypropylene sightcreens is that the lattes are removable.

They can be taken out and changed to white or black, depending on whether you are using a white or red ball, and they can also be taken out to prevent the structure blowing over in windy weather and for the winter closed season.

With the wind representing one of the biggest challenges when it comes to sightcreens Durant Cricket has also developed a mesh sight screen which allows the wind to blow through. Newly designed the sightcreens are now incorporating 16" wheels and longer hinged bracing bars to add strength and durability (10 year steel guarantee as standard) and all sightcreens are available with either a black lattes or a black mesh to accommodate the white ball game).

Pro cricket cages and nets

Excellent strength and manoeuvrability are two of the outstanding features of the Durant Pro Mobile cricket cage, making it a unique, quality cage. It is designed with the needs of clubs and schools in mind because every club and school has to be able to practice outdoors, whether on artificial or grass surfaces, and it is easy to install, maintain and move the Durant Pro Mobile cage.

Design features

Built with quality at the forefront, the box section cage is designed and manufactured from a rectangular box section with a hot dip galvanised finish.

Included is a pulling bar – making the cage easy to move – and a 10-year steel guarantee is provided as standard. The pulling bar ensures the cage can be easily pulled into position by one person and a recent redesign makes it even easier to install than previously. There are no complicated installation processes to follow.

Four or six swivel puncture-proof foam-fill wheels and two fixed wheels are provided which allow easy movement when combined with the pull bar.

A piece of black knotted 2.5mm net is also included, meaning the package provides for your club's complete net requirements.

Options

The Pro Mobile cricket cage comes in two sizes, giving more choice and flexibility depending on your requirements.

Options are 7.12m long by 3m high by 3.66m wide or 10.66m long by 3m high by 3.66m wide.

But what if the Pro Mobile cricket cage isn't quite what you need? Then the Club Mobile cricket net should be just what you need.

It's a budget option ready for club use, measuring 7.12m or 10.66m long but it is narrower than and not quite as high as the Pro Mobile cage.

Description	CS member discount price
Pro cage 7.12m	£995.00
Pro cage 10.62m	£1,475.00
500mm Anti vermin skirt	£5.00

Electronic Scoreboards

Here at Durant Cricket we have a wide range of different electronic scoreboards supplied by ECS. Electronic scoreboards are great at any sporting event; it allows spectators to see the score and stats clearly.

Having an electronic scoreboard eliminates the need to manually change the scores by hand all you need to do is simply input it and it will show up on the board. Not only is it simpler to use, but having an electronic scoreboard also looks more stylish, modern and pleasing for the spectators.

A lot of clubs and schools are now looking for an electronic scoreboard solution for their grounds and cricket playing venues. Durant Cricket are experts in installing both bespoke and standard electronic scoreboards and have successfully installed them at clubs and schools all over the UK and Ireland.

Durant Cricket offer a range of standard scoreboard designs through our specialist scoreboard division ECS, incorporating various information required at every level of the game from village cricket to first class cricket.

Cleverscore scoreboards

Durant Cricket is now offering a range of manual cricket scoreboards. The Clever Score Cricket Scoreboard range outperform all other manual scoreboard systems. This includes ease of use, visual accuracy & visibility, portability and placement (extremely light weight design) and best of all pricing. The scoreboards also cost substantially less than all other current and antiquated scoreboard systems.

No more fumbling with numbers or trying to slide difficult digits across. Clever Score Modules are easy to read and are changeable in an instant through their simple and revolutionary self locating design. Made from lightweight, durable and fade resistant ABS plastic our Modules are long lasting hard wearing units that require no maintenance and are suitable for both indoor and outdoor use.

Clever Score Cricket Scoreboards come in a range of standard designs or if you prefer, we can custom design your scoreboard to suit your requirements.

Clever Score Modules are attached to a space age alloy composite product which offers strength and incredible low weight benefits (75% lighter than traditional plywood!). Being a composite material there is also total resistance to weathering and water damage unlike timber or metal scoreboards.
